

Meet the 30 largest infrastructure investors

The institutions in our debut Global Investor 30 ranking have committed \$321bn to the asset class.

As we were gearing up to publish our special 10th anniversary issue, we debuted the Global Investor 30, our ranking of the asset class's 30 largest institutional investors.

We carried out primary and secondary research on more than 100 institutions to produce a ranking based on the market value of investors' private infrastructure investment portfolios both through

third-party managed vehicles and direct investments.

The GI 30 joins our Infrastructure Investor 50, our long-running ranking of the 50 largest equity managers in the asset class, and the Infrastructure Investor Debt 10, debuted this year to cover the 10 largest infrastructure debt managers.

We look forward to publishing the GI 30 annually in the years to come.

THE TOP 10

The 10 largest investors have committed \$182bn of the \$321bn invested in infrastructure by the Global Investor 30

THE GLOBAL INVESTOR 30

The 30 largest institutional investors have committed \$321bn to the asset class
