What is on the agenda?

Investor insights

Both private and institutional investors will take part across the four-day agenda, featuring on panels, debates and delivering insightful presentations. Hear how investors are meeting the need for yield and planning their capital deployment across the debt landscape.

DACH region expertise

The agenda for the PDI Germany Forum offers an opportunity to truly examine the asset class's impact on the DACH region. Listen to specialist debt funds, German institutional investors, and other regional experts across the packed agenda.

A key year for ESG in private debt

With the EU taxonomy, the Sustainable Finance Disclosure Regulation (SFDR), and increasing investor demand, debt funds are under more pressure than ever to deliver results when it comes to ESG. Hear first-hand how they are going above and beyond to do so.

In-depth case studies

The PDI Investment Committee returns. Watch and assess case study presentations delivered by leading debt funds from across the globe. Make comments, ask questions and vote in this interactive and informative session.

Scaling for an increasingly multi-faceted asset class

As the private debt asset class matures, opportunities such as secondaries, asset-backed lending and special situations are becoming more mainstream. Find out how fund managers are meeting this increasing demand for multi-strategy solutions.

Face-to-face networking returns

After more than a year without face-to-face networking, our programme brings you ample opportunity to do exactly that. Join us in London and Munich to connect, benchmark and share insights with your peers once again.
