RI USA 2022

Convene 117, W 46th Street, New York
6-7 December 2022

The Responsible Investor USA conference will provide insight into how leading organisations in the public market are implementing ESG and responsible investment strategies that deliver value and sustainable outcomes in the US market.

Debate with sustainably focused investors on current trends that are shaping the regional and global landscape, including updates on the challenges and opportunities in the continued journey towards net-zero, climate risk strategies, new disclosure rules, and the rise of proxy voting and engagement, set against a contentious backdrop of political division and the rise of anti-ESG sentiments.

The event comes at a critical time, coming off the back of COP27 and the mid-term elections, and looking ahead to COP15 and the year 2023. It is a must-attend for ESG, sustainable finance and responsible investment professionals in North America.
